**Catálogo
de filtros
y sus aplicaciones.**

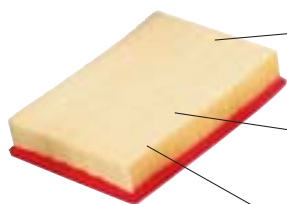

ACDelco[®]

Calidad original para tu auto.

Filtros ACDelco®. Mayor pureza en tu motor.

Filtros de aire ACDelco®. Planos, redondos, ovalados y cilíndricos.

Papel especial, tratado químicamente y plegado homogéneamente.

Área de filtrado uniforme.

Cordón de cola.

Cordón de cola térmica, asegurando la homogeneidad del plegamiento.

Cerramiento de poliuretano.

Garantiza la fijación y el total hermetismo entre el elemento filtrante y la carcasa. Soporta altas temperaturas.

Funciones principales del filtro de aire ACDelco®.

El filtro de aire ACDelco® retiene las impurezas existentes en el aire, tales como: polvo, arena, hollín, etc. Garantiza que sólo aire limpio llegue al sistema de aspiración del motor.

¿Por qué cambiar el filtro de aire?

El filtro de aire saturado provoca consumo excesivo de combustible, pérdida de potencia y recalentamiento del motor.

INSTRUCCIONES DE MONTAJE.

- 1- Limpie el área donde se asienta el filtro en la carcasa con un paño que no arroje impurezas. No use productos químicos.
- 2- Asiente las superficies de cerramiento del filtro uniformemente en la carcasa.
- 3- Cierre la caja del filtro asegurándose de que las presillas y los tornillos estén fijados correctamente.

Filtros de combustible ACDelco®. Para motores a carburación.

Carcasa de nylon, acero, aluminio o plástico conductivo.

- Alta resistencia a la presión.
- Estanqueidad conforme a normas internacionales.

Funciones principales del filtro de combustible ACDelco®.

El filtro de combustible ACDelco® retiene los contaminantes presentes en el combustible y aquellos resultantes del deterioro de los componentes del sistema de combustible, evitando que los mismos obstruyan los orificios del carburador o del sistema de inyección electrónica.

¿Por qué cambiar el filtro de combustible?

El filtro de combustible saturado provoca fallas de alimentación del motor, principalmente en marcha lenta, y consumo excesivo.

INSTRUCCIONES DE MONTAJE.

- 1- Remueva la tapa del tanque de combustible para bajar la presión en la línea y reducir la cantidad de combustible que será desperdiciada.
- 2- Desconecte el filtro, soltando la fijación al vehículo y también las abrazaderas de las mangueras.
- 3- Instale el nuevo filtro de combustible ACDelco® observando el sentido indicado por la flecha grabada en el filtro.
- 4- Ponga el motor en marcha por algunos minutos y certifique que no haya pérdidas de combustible.

Filtros de aceite ACDelco®.

Carcasa. Terminación antioxidante.

Elemento filtrante. De papel especial tratado químicamente.

Válvula de alivio. Funciona cuando el elemento filtrante está saturado de impurezas impidiendo que el motor corra el riesgo de funcionar sin aceite.

Válvula anti-retorno. Mantiene el aceite dentro del sistema de lubricación cuando el motor está apagado, evitando que entre en funcionamiento sin aceite en el sistema.

Funciones principales del filtro de aceite ACDelco®.

El filtro de aceite ACDelco® retiene las partículas abrasivas provenientes del rozamiento de las piezas móviles del motor y de otros elementos contaminantes presentes en el aceite.

¿Por qué cambiar el filtro de aceite?

El filtro de aceite saturado permite el pasaje del aceite contaminado al motor, causando atascos, aumento de temperatura y desgaste prematuro del motor.

INSTRUCCIONES DE MONTAJE.

- 1- Drene y deseche el aceite del cárter y remueva el filtro usado, desatornillándolo. Si fuera necesario, use herramientas (cinta o extractor).
- 2- Limpie el área de asentamiento en el bloque del motor con un paño que no arroje impurezas (no use estopa).
- 3- Aplique una película de aceite ACDelco® (nuevo) en la junta del filtro.
- 4- Enrosque el filtro de aceite ACDelco® (nuevo) hasta que la junta de goma encaje en la base (no use herramientas). Después de este pre-montaje, enrosque más de una vuelta.
- 5- Agregue aceite ACDelco® (nuevo) y posteriormente ponga el motor en marcha lenta por algunos minutos.
- 6- Asegúrese de que no haya pérdida de aceite ni por el cárter ni por la junta del filtro de aceite.

Observaciones: asegúrese en la tabla de aplicaciones ACDelco®, de estar usando el filtro correcto (rosca y/o juntas diferentes a la original pueden causar pérdidas de aceite). Verifique que la luz indicadora de presión de aceite se apague con el motor en funcionamiento (puede demorar unos segundos); caso contrario, apague inmediatamente el motor, reinstale el filtro y verifique el nivel de aceite. No acelere el motor para que la luz indicadora se apague.
